

## Cocamide Methyl MEA

### Main Ingredient

Cocamide Methyl MEA

### Specification

Item	Specification
Appearance (25 °C)	Light yellow to yellow liquid
Color, Hazen	≤350
pH (1% , 10% ethanol solution)	9.0-11.0
Amine value, mgKOH/g	≤30.0
Glycerine, %	9.0-12.0

### Characteristics

CMMEA is a kind of new liquid surfactant with non-toxic and low-irritation. It has good foaming property, stability and thickening effect. Excluding EU-restricted diethanolamine and nitrosamines, it has good frost resistance

### Application

- 1.Suitable for household cleaning products such as shampoo, shower gel, hand soap, detergent, and laundry detergent use.
- 2.Suitable for all types of personal care products use.

### Packing &Storage

200 kg (n.w.) per plastic drum. Store in a dry and cool place, keep away from sunshine and rain. Under normal packing and storage condition, the quality guarantee period is 24 months.

### Product operation &Safety guidelines

Please read safety specifications to ensure safety when using Transfar's products under special conditions. Material safety technical specification (MSDS) can be obtained from Transfar. When using other chemicals in this document, obtain the relevant safety technical information and take appropriate safety precautions.
